Although my curent proffesion is Profesor of Goegraphy I am passionat about IT. That's why I started educating myself by enrolling to different on-line courses. I found out that working in IT is more attractive to me and even started working on-line as freelancer. It gives me freedom. I can organize my day how I want and I found out I have more time for my family and friends.

I started studing Metropolitan studies in order to develop my career. I expect so much from studing. I am sure that I have done good decision. On line studing and contemporary teaching program will give me neccesary skills and knowledge.

In the future I see myself working as IT expert. After working in different companies in Serbia but also on line. I can gain a lot of useful experiance about working but also leading company. Also, I managed to improve my English so I can comynicate with people and companies all around world. I hope that my skills and my future employees will make my company bigger and more succesful every year.
